PROFILE

IT support professional with a dual degree in Information Technology and experience in hardware and software configuration, technical troubleshooting, and system maintenance. Skilled in integrating computers, cameras, and printers, with additional experience supporting server and network operations.

EDUCATION

Bachelor of Information Technology - Dual Degree

Asia Pacific University (APU) and De Montfort University
Cumulative GPA: 3.3/4.0

Kuala Lumpur, Malaysia
Nov 2022 - Nov 2025

WORK EXPERIENCE

IT Technical Support | Qbox

Riyadh, Saudi Arabia
Jul 2025 - Feb 2026

- Set up, configured, and maintained photobooth systems for event operations.
- Integrated desktop computers, high-resolution cameras, and industrial printers with photobooth software.
- Troubleshooting hardware and software issues in real time, including communication between connected devices and applications.
- Performed routine maintenance and system updates to support reliable operation during events.

Network Intern | Data Solution BHD

Kuala Lumpur, Malaysia
Aug 2023 - Feb 2024

- Assisted with server configuration and maintenance in enterprise IT environments.
- Worked with technical teams to troubleshoot network issues and monitor private network infrastructure.
- Supported network security practices and internal IT workflows.

TECHNICAL PROJECTS

Hassel | SaaS Property Management Platform | 2026–Present

- Built a multi-tenant system for property owners and real estate teams to manage leases, tenant records, and rent collection, with role-based access for owners, managers, finance staff, and tenants.
- Integrated an AI assistant linked to system data and WhatsApp tenant support for maintenance requests, receipt-based payment recording, tenant communications, and automated rent reminders.
- Technologies: Next.js, React, TypeScript, Prisma ORM, PostgreSQL, and Vercel.

University Final Year Project: Event Management System (Invaro) | 2025

- Developed a full-stack event management system featuring guest imports, RSVP tracking, and QR code check-ins.
- Integrated Gemini AI for AI-powered personalization of invitations and utilized Twilio API for WhatsApp/email automation.
- Built using PHP Laravel, SQLite, and Tailwind CSS with cloud-ready deployment concepts.

TECHNICAL SKILLS

- IT Support: Hardware and software configuration, device integration, technical troubleshooting, system maintenance and updates.
- Networking and Servers: Server configuration support, network monitoring, network troubleshooting, network security fundamentals.
- Scripting and Tools: Python, PHP (Laravel), Git, GitHub.
- Databases and Cloud: MySQL, PostgreSQL, SQLite; AWS and GCP fundamentals.
